

Control Wizard

Current Release Version: 1.0

Control import and deployment scripts easily!

A control file is an XML file that you use with pmrep commands to import or deploy objects in Informatica PowerCenter™. The parameters you specify in the control file determine the actions that take place when you run the pmrep command.

Control Wizard guides you through the steps to create a deployment or import control file for Informatica PowerCenter™.

Features

Usability

Easy to use wizard application. Every step takes only a few clicks. Drag 'n' drop support. Save validation file with wizard.

Control File

Control Wizard fully implements and supports deployment and import control files for Informatica PowerCenter™.
