

# SQL Wizard

Current Release Version: 1.0

## Create SQL code easily!

SQL is designed for managing data in relational database management systems. Its scope includes data query and update, schema creation and modification, and data access control.

SQL Wizard guides you through the steps to create SQL code.

## Features

### Usability

Easy to use wizard application. Every step takes only a few clicks. Drag 'n' drop support. Open/save sql file with wizard.

### Editor

Feature-rich editor providing Unicode support, syntax highlighting, SQL syntax reference and examples, Find/Replace and Go To Line dialog, Undo/Redo function, advanced edit functions (comment, convert characters, change case, transpose, etc.), WYSIWYG printing, and more!

### SQL

SQL Wizard fully implements and supports SQL-92 standard and allows you to create SQL code for the following databases: DB2, Informix, Microsoft SQL Server, Oracle, Sybase, Teradata.

### Connectivity

Execute query or script by using ODBC connection.

### Preview

Summary of specified settings and preview of SQL code.

### Help

Help for common tasks.

### Services

1 year maintenance and premium support.

## Requirements

- Intel Pentium 3, 500 MHz or equivalent
- Microsoft Windows 2000/XP/Vista/7
- Microsoft .NET framework (2.0)
- ODBC Drivers (32 bit)
- 256 MB RAM
- 10 MB free hard disk space
